CONNECTIVITY DETAILS

Hard Line Internet or Phone Line Orders

To order a hard line internet drop, be sure to alert your Event Manager at least three weeks in advance. To order a phone line anywhere in the building, you will need to schedule this through Century Link 855.891.4083 at least three weeks prior to your event and have the installation scheduled for the event load-in day. Please alert your Event Manager as soon as these details are ordered and confirmed.

Tacoma Dome Wi-Fi Service

The Tacoma Dome offers complimentary Wi-Fi to all guests. Guests can connect to "Dome-Public" to use this service. "Dome-Public" has a variable level of bandwidth associated with it and has no guarantee of upload or download speeds available.

Should an event want a dedicated level of up/download speeds, they should consider one of two options:

1. Access to SSID Dome-BOH: This password protected option provides 10 or 20 Mbps up/down speeds to events that are only concerned about a reliable, dedicated service. The password will be given to event planner to distribute to attendees. Billing will be based on the number of unique devices associated with this SSID.

Speed	Number of Devices				
	100 or less	101-250	251-450	451-650	651+
10 Mbps	$450.00	$600.00	$900.00	$1,800.00	$3,500.00
20 Mbps	$700.00	$1,000.00	$1,400.00	$2,800.00	$4,800.00

Rates shown above are valid through September 2026. Check with your EM for updated rates per vendor.

2. Customized SSID and Portal: A client determined SSID will direct guests to a customized portal with client provided background and will prompt guests to enter a client determined password. The password will be given to event planner to distribute to attendees. Billing will be based on the number of unique devices associated with this SSID.

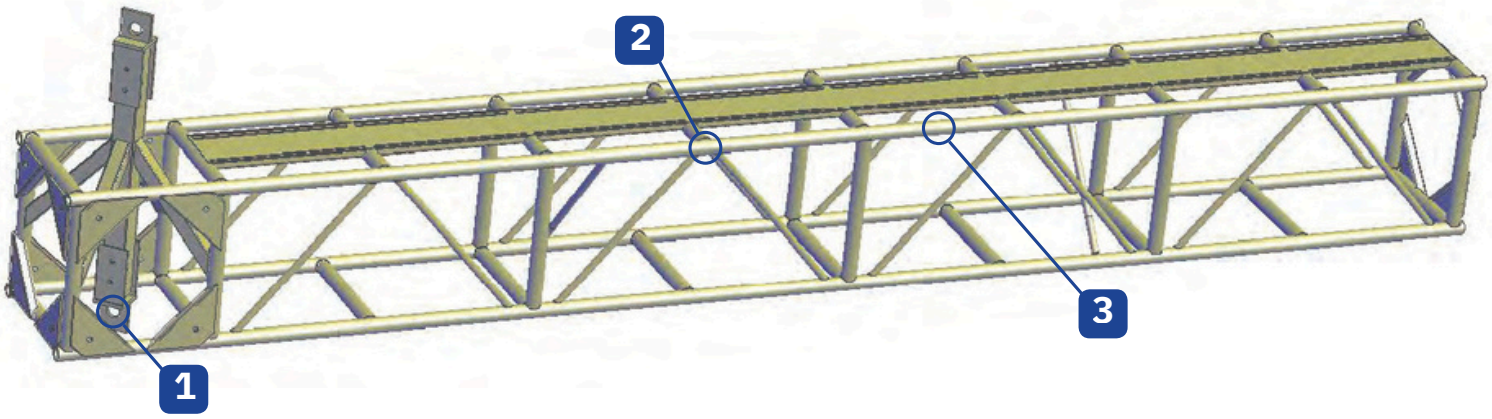

Speed	Number of Devices				
	100 or less	101-250	251-450	451-650	651+
10 Mbps	$900.00	$1,200.00	$1,800.00	$3,600.00	$7,000.00
20 Mbps	$1,400.00	$2,000.00	$2,800.00	$5,600.00	$9,600.00
	Faster speeds may be available with prior arrangements				

Rates shown above are valid through September 2026. Check with your EM for updated rates per vendor.

The quality and condition of individual wireless devices varies so widely that the Tacoma Dome cannot guarantee the connectivity of every single device and every attendee. Limited support through our wireless provider is available should a guest experience difficulty connecting.

If a guest or vendor needs assistance with connecting to the venue's Wi-Fi, they can call Boldyn Networks' 24 hour service line at 1.877.999.7070. Boldyn Networks will help our guests troubleshoot connectivity issues.

TRUSS LOAD CAPACITY

1. Hanger Node capacity: **4,000 lbs**.
2. Hang within 3 inches of any Upper Panel point for a maximum load of **2,500 lbs.**
3. Hang a maximum load of **500 lbs.** at any location on Upper Chord.

Important!

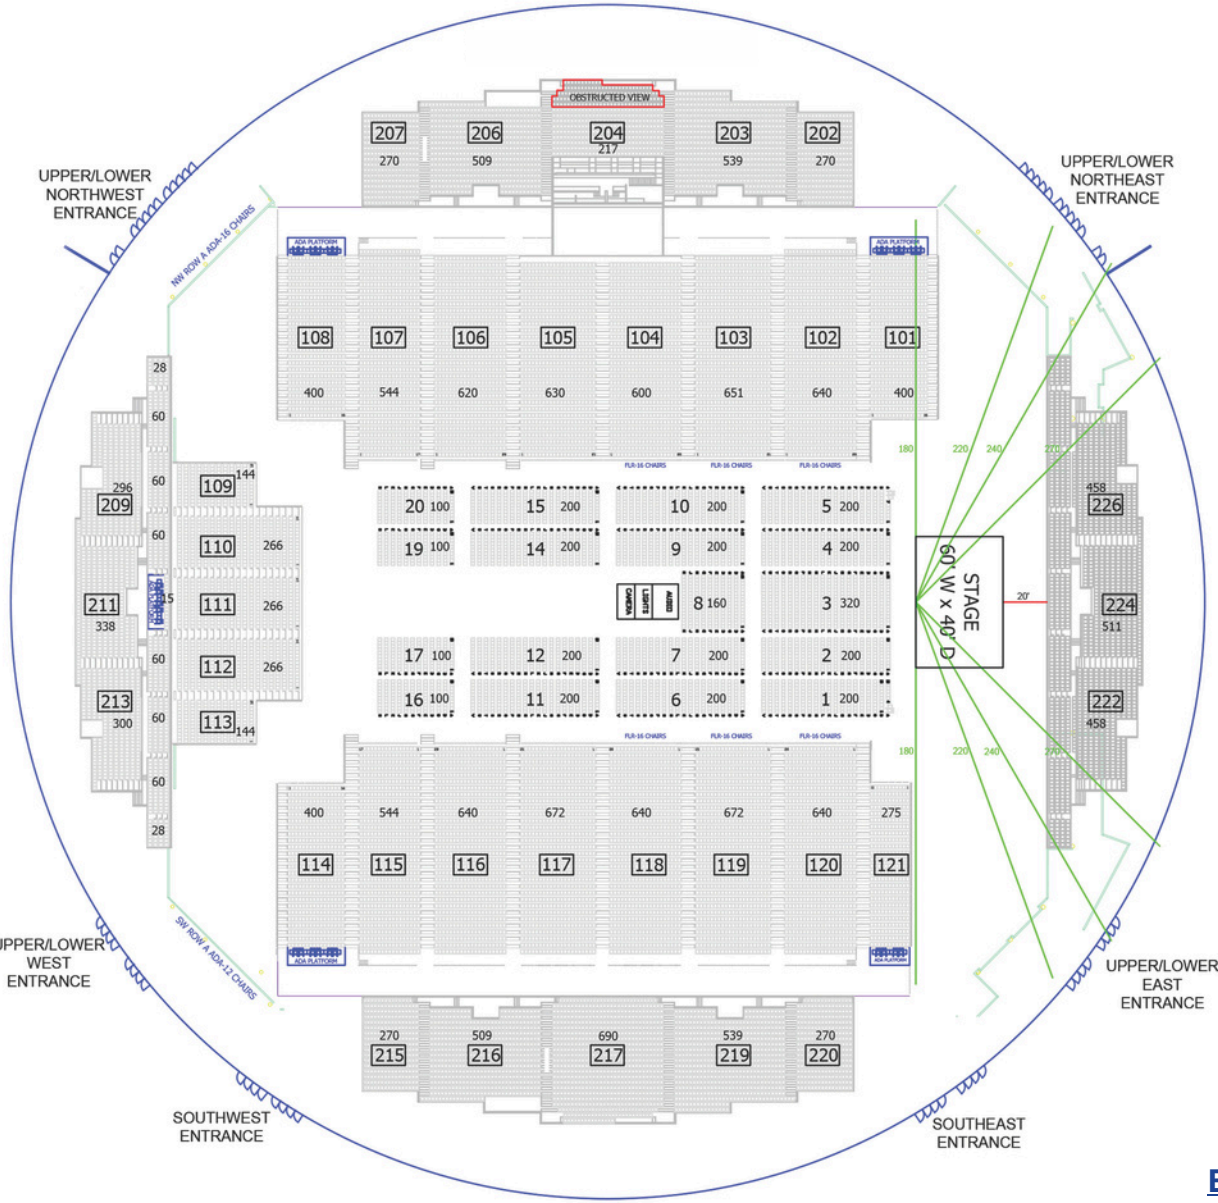

- The **maximum** allowable live load on any one truss is **5,500 lbs.**
- **Do not** use traditional c-clamps on truss. Only use 2" aluminum theatrical truss couplers (cheeseboro).
- **Do not** wrap the aluminum rigging grid with unprotected cable.
  Only use steelflex wire rope slings or approved protected cable to wrap truss.
- **Do not** rig from access bridges.
- **Do not** cut or drill through any member.
- Any steel or dissimilar metal used to support hanging loads in contact with the aluminum truss shall be either galvanized and/or wrapped with a sufficient barrier to protect the aluminum truss from corrosion.
